

TIRE PRESSURE  
MONITOR REPORTING

CONNECTED SOLUTIONS

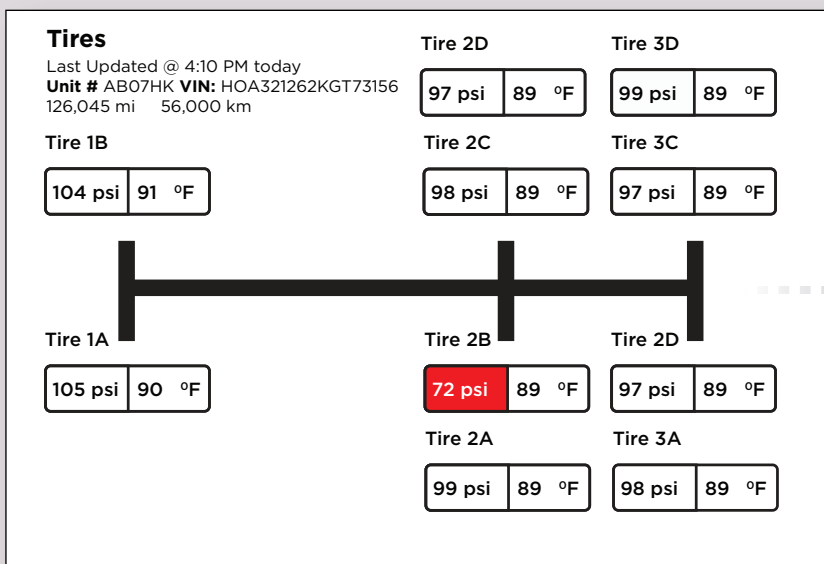

# TIRE PRESSURE MANAGEMENT MADE EASY

Tire Pressure Monitoring System reporting is part of International Truck's Intelligent Fleet Care set of premium connected vehicle solutions. It delivers visibility of key TPMS data from properly equipped International® trucks to fleet managers, enabling greater awareness and decision-making that can lead to greater fuel efficiency, more uptime, and a lower Total Cost of Ownership.

# ACTIONABLE TIRE DATA AT YOUR FINGERTIPS

TIRE PRESSURE  
MONITOR REPORTING

Using connected vehicle data through OnCommand® Connection (OCC), TPMS reporting provides critical tire pressure, temperature data, and more to fleet managers, so they can more easily ensure vehicles are being operated for maximum efficiency for greater fuel economy and tire life.

## Tire Pressure Monitoring Features

- Customizable high and low pressure and temp alert thresholds
- Colored alert coding makes it easy to recognize issues that may need to be addressed
- Data delivered where and when you need it:
  - OCC portal provides fleet and VIN-level views to scan and analyze
  - Alerts integrated to International® 360 Service Communication platform
  - Customizable email reports sent straight to your inbox
  - APIs available to deliver data directly to your fleet maintenance system

TPMS reporting requires International® Trucks to be equipped with factory-installed TPMS sensors and factory-installed telematics device. To learn more, contact your International® dealer or email [OCCoperations@Navistar.com](mailto:OCCoperations@Navistar.com).
